North Glendale school to get addition

The Kirkwood School District is in the planning phase of an expansion of the North Glendale Elementary School, 765 N. Sappington Road.

District voters in November 2010 approved Proposition 1, which proposed a bond issue to fund several building projects, including an addition to the North Glendale School building.

The expansion will address safety issues as well as the need to house all the kindergarten students expected in the coming years. Currently, children who would attend North Glendale are bused to Tillman Elementary School for kindergarten.

The proposed addition to the north end of the building will include a new cafeteria/multipurpose room and restrooms on the ground level; four classrooms and a conference room on the second floor; and a new stairway and elevator

connecting all three levels. The existing building will be renovated to include conversion of the current cafeteria to a new kitchen and serving area.

Planned site improvements include modifications to the existing north parking lot and

Design phase begins on Kirkham reconstruction

The preliminary design phase will begin this spring for a major \$1.9 million reconstruction of Kirkham Avenue between Sappington Road and the eastern Glendale City boundary.

The City recently chose Weis Design Group as the design firm after a selection process. The first steps in the design process include surveying along the street and assess-

ing existing conditions along the roadway. Design work is scheduled for 2011 and 2012 and construction is scheduled for 2013.

“During the design process, there will be opportunities for our residents to view and comment on design plans for Kirkham Avenue,” said City Administrator Jeremy Hayes. “As with any street construction project, coordination with

the residents who are directly affected is critical for a successful project.”

The Kirkham Avenue project will include resurfacing the street, reconstructing curbs, eliminating sight distance problems and improving drainage. Reconstruction of sidewalks and handicapped accessible curb ramps at all intersections will improve pedestrian

Continued on Page 4

MAYOR'S MESSAGE

Dear Residents:

After shoveling our way through a particularly snowy winter, spring has arrived once again. This is always an exciting time of year, as we look ahead to

warmer weather and outdoor activities. It will be a busy spring and summer for the City of Glendale, and I am pleased to share with you some of the great things happening in our community.

This spring we are pleased to begin the design phase for the Kirkham Avenue reconstruction project. Construction is still two years away, but surveying and design is a critical first step in this project. Kirkham is one of our primary routes in Glendale, both for motorists and pedestrians. The reconstruction will result in a smoother street

Police Chief to retire after 42 years of service

After more than 42 years with the Glendale Police Department, 25 of them as Chief, Richard Black will retire from the City at the end of April.

Chief Black joined the Police Department in January 1969 as a police officer. He was promoted to sergeant in September 1971 and to Chief in 1986. Chief Black has received many awards and recognitions in his career, including the Missouri Police Chiefs Association's 2009 Outstanding Police Chief Award.

The Mayor and Board of Aldermen sincerely thank Chief Black for his service to the community and wish him the best for retirement. The community will have the opportunity congratulate Chief Black on his retirement at an event to be announced later this spring.

surface and new sidewalks and lighting to help keep walkers and joggers safe. By taking advantage of a federal transportation grant, we also are able to leverage City funds and get the most value for our local tax dollars.

Another big project on the horizon is an addition to the north side of North Glendale Elementary School. The school expansion project will add classroom space, a new cafeteria and many other interior improvements. The existing parking lot will be expanded and redesigned to improve school bus access and make for easier student pick-up and drop-off.

North Glendale Elementary is a huge asset to our community and one that the City is pleased to support. That is why the City helped fund school playground improvements last fall. The school grounds also serve as a community park for Glendale — one that we hope everyone will enjoy as temperatures rise again this spring.

With the snow plows and salt spreaders put away for the summer, our Public Works crews will return to their extensive summertime responsibilities. These include street maintenance, installation of asphalt curbing, tree trimming, mosquito abatement and many more tasks. Public Works is a key part of the City of Glendale team that keeps our City running smoothly.

Another critical but behind-the-scenes aspect of the City of Glendale is emergency preparedness. From our Emergency Operations Center at City Hall, our fire and police departments can monitor and manage incidents large and small to ensure our residents

are safe and secure. Spring weather can be unpredictable. Keep in mind that City staff are always monitoring the threat of severe weather and trained to respond to anything that blows our way.

The City of Glendale also provides emergency management services (along with fire protection) to the City of Warson Woods. This longstanding contractual relationship is one of many examples of service sharing among municipal governments in St. Louis County. This spring ends my tenure as president of the St. Louis County Municipal League, and I've had the opportunity to see many examples of creative cooperation between cities in St. Louis County. As in Glendale, municipal governments throughout St. Louis County are the front line of public service.

A perennial favorite spring event in Glendale is JazzFest, which will be held Friday, May 27 in the City Hall parking lot. This will be the 12th annual JazzFest, an event that has become a fixture of Memorial Day weekend in Glendale. I encourage you to come out and enjoy the festivities with your friends and neighbors. We hope to see you there.

Finally, let me remind you that a municipal election will be held on Tuesday, April 5. Please remember to vote.

Thank you for your continued interest and involvement in our community. Please let me know if I can be of assistance to you.

Warmest regards,
Mayor Richard Magee

School

From Page 1

playground. A new access drive from Chelsea Avenue will serve school buses and improve student pick-up and drop-off circulation.

The original portion of the school was built in 1937 and additions were built in 1951, 1955, 1964 and 1987.

Playground dedication

On the south side of the school, a newly renovated playground was dedicated Oct. 10.

The renovation was a joint project of the City of Glendale, the Kirkwood School District and the school's Parent Teacher Organization. It was funded by a \$176,826 matching grant from the Municipal Parks Grant Commission of St. Louis County.

The project included installation of new playground equipment and a new rubberized playground surface. Other site improvements designed to improve safety and increase accessibility include relocated lighting, a new entrance, an improved sidewalk, new railings and new landscaping.

City, Ameren workers to trim trees this spring to ensure safety

Both City and Ameren Missouri crews will be out in force this spring trimming trees and other vegetation to ensure the safety of Glendale residents.

Every year in mid-May, the Glendale Public Works Department trims back trees, bushes and other vegetation growing within or over public streets and sidewalks.

Any tree limb, bush, shrub or other type of vegetation growing lower than 9 feet over a public street will be trimmed or removed completely. Vegetation growing near an intersection will be trimmed in order for drivers approaching the intersection to have a clear line of sight of other approaching vehicles at a reasonable distance.

All trimming done by the city is performed in accordance with the Missouri Department of Conservation's basic pruning guidelines. It is conducted in the spring in order for bushes and trees to re-blossom in time for summer.

Meanwhile, crews contracted by Ameren Missouri will be in the Glendale area over the next few months trimming trees that could interfere with electric service during storms.

Ameren trims trees near utility wires on a three- to four-year cycle in an effort to prevent falling trees and branches from bringing down power lines during severe weather.

"This is part of Ameren Missouri's ongoing commitment to deliver safe, reliable service," said an Ameren spokesperson. "Tree trimming is a priority for us. Trees, especially during severe weather, are a leading cause of power outages."

Ameren works with municipalities through its Municipal Tree Replacement Program to manage city-owned trees that were planted under utility wires. This partnership involves removing trees that require ongoing pruning away from utility wires and replacing them with more appropriate trees.

Ameren last trimmed in the Glendale area in 2007. Although the work is done by contractors, the project is overseen by Ameren's Vegetation Management division. Residents with questions or concerns may contact Ameren by calling 1-800-552-7583 or sending e-mail to AmerenMissouriTreeTrimming@ameren.com.

An Ameren Missouri worker trims trees to protect power lines.

MSD begins design of one project, construction on Frederick Lane

Some Glendale homeowners will receive letters this spring from the Metropolitan Sewer District seeking information on properties that may be included in a project designed to help reduce sanitary sewer back-up.

MSD recently approved a contract with Civil Design Inc. for the design phase of the project, which will involve rehabilitation of about 100 private sewer laterals and disconnection of roof drains and other inflow sources. The purpose of the Glendale Section D Sanitary Relief Inflow/Infiltration Reduction project is to alleviate basement backups and over-charged sanitary sewers.

Based on homeowners' replies to a questionnaire and onsite inspections, MSD

representatives will evaluate properties to determine whether disconnections from the sewer or new drainage improvements are needed.

"It's beneficial for homeowners to fill out the MSD surveys and cooperate with MSD," said City Administrator Jeremy Hayes. Neither the City nor Glendale homeowners will be charged for the work.

The design phase will consist of surveying, assessment and design of the drainage improvements. At this point, the designer will focus on narrowing down which properties most need adjustments.

The overall project covers an area that includes parts of Glendale, Kirkwood and Rock Hill.

The construction phase is scheduled to

begin in 2012. Disruption should be limited to the private property involved and minimal work in street right of way.

Glendale officials will work closely with MSD on the project.

Frederick Lane

Work was scheduled to begin in early March on a sewer project on Frederick Lane.

The project, which will replace an antiquated sanitary sewer line that runs between 33 Frederick Lane and 1219 Nancy Carol Lane, will affect directly 10 residential properties. The work involves enlarging the sewer main and eliminating storm water infiltration. Construction is expected to take six to nine months.

POLICE BEAT

Watch for joggers, walkers, cyclists

Glendale has always been a wonderful place to live, work and raise a family. Its neighborhood-style atmosphere brings out the exercise enthusiasts at all times of the year. Pedestrians and joggers are asked to use the sidewalks when possible and to wear reflective or light-colored clothing so motorists can better see them in the early morning, dusk and nighttime hours. Bicyclists also should wear reflective or light-colored clothing while riding throughout the City. We have had several close calls between motorists and joggers, walkers and bicyclists because the motorist didn't see them until it was almost too late.

Cyclists must obey traffic laws

State law states that all bicycle riders, when riding on a street or highway, are granted all the rights and are subject to *all* traffic regulations applicable to drivers of motor vehicles, including obeying stop signs, yielding to pedestrians and signaling turns.

Helmets for all on wheels

In April 2008, the City passed an ordinance requiring all people, regardless of age, operating or riding on a bicycle or

using inline skates, roller skates, a skateboard or an electric personal assistive mobility device on a public roadway, public bicycle path or other public rights of way, shall wear protective headgear of good fit, fastened securely on the head with the helmet straps. The definition of protective headgear by City ordinance is "a piece of headgear which meets or exceeds the impact standard for protective bicycle helmets set by the U.S. Consumer Products Safety Commission federal safety standards, those developed by the American National Standards Institute, the Snell Memorial Foundation or the American Society of Testing and Materials."

Watch your neighborhood

The Neighborhood Watch program is one of the most effective partnerships between a community and its police department. Citizens involved in Neighborhood Watch take ownership of their neighborhood.

Information provided by residents trained in Neighborhood Watch is used to solve and prevent crime. The programs target residential burglary, thefts from vehicles, vandalism, auto theft and personal safety. Neighborhood Watch organizes a

neighborhood and teaches residents what is and how to report suspicious activity.

If your neighborhood is interested in a Neighborhood Watch program, please

contact the department's Crime Prevention Specialist, Sgt. Bob Catlett, at (314) 965-0000.

Going on vacation? Let us know

If you are going on a trip or will not be at home for an extended period of time, please contact the Police Department to have your address placed on the Property Watch list. The police officers will make periodic checks of your residence to make sure it is secure. While you are not home, make sure to stop or forward your mail, stop newspaper deliveries and make the home appear occupied by using lights on timers, setting radios to a talk radio station to make it sound as if there are people inside, having the lawn cut, and so on. Also, let your neighbors know you will be gone so they can keep an extra eye out for anyone or anything suspicious in your neighborhood.

Portable alarm system available

The Voice Activated Radio Dispatched Alarm (VARDA) is a portable alarm system available to Glendale residents, free of charge, on a first-come first-served basis. The alarm may be used when the resident is out of town for a short period, ideally five to 10 days. During this time, no one, including pets, may enter or remain in the home.

Two thermal detection units are strategically placed to monitor the most vulnerable areas of a home. If an intruder crosses the detector's path, a radio message is broadcast over the police radio alerting officers of a burglary in progress, allowing immediate response by the department.

To reserve a VARDA, contact the Police Department at (314) 965-0000.

Kirkham

From Page 1

mobility along the corridor. Relocation of utility poles and installation of decorative lighting will improve safety and make the street more attractive.

The project is being funded by an 80 percent federal Surface Transportation Program grant in coordination with the Missouri Department of Transportation. Because this project is primarily funded by a federal grant, it must follow a very specific process and timeline. The City also is required to provide a 20 percent local match to receive the grant funds. The City's share of the cost will come primarily

from its Capital Improvement Fund. The majority of that money is already held in reserve, with additional funds budgeted to be reserved over the next two years.

Kirkham Avenue is a well-traveled street that provides access for many residents in the Kirkwood, Glendale and Webster Groves area as an alternate route to Manchester Road. The proposed improvements to roadway, sidewalks and storm sewers, as well as the installation of decorative lighting, will make for a safer, more attractive street for both motorists and pedestrians.

BURNING ISSUES

2010 Firehouse Run

Approximately 530 runners participated in the 31st Annual Firehouse Run, held Oct. 31 at Glendale City Hall. The event raised about \$5,100 to benefit three charitable organizations. About 50 volunteers and City staff from all departments made the event run smoothly. KYKY-98 Radio personality Jen Myers served as emcee.

Checks were issued to the charitable beneficiaries, as follows: Backstoppers (\$2,500), Glendale-Kirkwood Kiwanis Scholarship Fund (\$1,600) and the Kirkwood Area Perpetual Scholarships Program (\$1,000).

Disaster Preparedness

The time is fast approaching for storms and potential disasters. As we all witnessed on Dec. 31 in our neighboring communities of Sunset Hills and Crestwood, we are all at risk of being involved in a natural disaster. Being prepared is the essential key to surviving that event if it happens to you.

Know your warnings: If the tornado warning sirens are activated (a 3- to 5-minute steady alert tone), individuals should immediately seek information, then shelter if recommended. Check local television and radio broadcasts or alerts issued by the National Weather Service over any “tone alert weather monitor” activated by the NWS. Immediate evacuation may not always be warranted based upon the location of the storm, so it is important that citizens monitor local media sources or weather radios for the duration of the warning.

What to do before and after a disaster strikes: Disaster can strike quickly and without warning. It can force you to evacuate your neighborhood or confine you to your home. What would you do if basic services — water, gas, electricity or telephones — were cut off? Local officials and relief workers will be on the scene after a disaster, but they cannot reach everyone right away. Families can — and do — cope with disaster by preparing in advance and working together as a team. Follow the steps listed below to create your family’s

disaster plan. Knowing what to do is your best protection.

Create a disaster plan: Having a plan is the most important step in a disaster. Knowing what to do will guide you during and after an event. Educate your family, explain the dangers of fire, severe weather and earthquakes to everyone in the family, especially children. Plan to share responsibilities and work together at a team. Pick TWO places to meet if a disaster happens, one right outside your home and the second outside your neighborhood if you can’t return to your home or the area is unsafe. Everyone must know the address, location and phone number of that place.

Have a family contact person out of state. After a disaster, everyone should contact that person and report their location and condition (if OK or not). This way, that one person can be the communicator for the family. Finally, have a plan for your pets. Pets are family, and building them into the plan is just as important.

Be prepared and have a kit: Keep enough supplies in your home to meet your needs for at least three days. Assemble a

disaster supplies kit with items you may need in an evacuation. Store these supplies in sturdy, easy-to-carry containers such as backpacks, duffle bags or covered trash containers.

A kit should include:

- a three-day supply of water (one gallon per person per day) and food that won’t spoil.
- one change of clothes, footwear, blanket or sleeping bag per person.
- a first aid kit that includes family prescriptions and medications.
- emergency tools including a battery-powered radio, flashlight and plenty of extra batteries.

Some additional items that could be important include an extra set of car keys; a credit card, cash or travelers checks; sanitation supplies; and special items for infants, elderly or disabled family members and pets.

Keep a smaller kit in the trunk of your car, and keep important family documents in a waterproof container and on cell phones.

Mosquito control program to start in mid-May

Spring is just around the corner, bringing green grass, beautiful flowers, warm temperatures and mosquitoes. In order to control the mosquito population and help prevent the spread of disease, the Public Works Department will start its mosquito control program in mid-May.

The City of Glendale has one of the most comprehensive mosquito control programs in all of St. Louis County. It is designed to target mosquitoes in all stages of their lifecycle from egg to adult by means of briquettes, trapping and fogging.

Briquettes are applied to all creeks and stormwater inlets throughout the community once a month to prevent mosquito eggs from developing into adults. This is the most effective means to prevent mosquitoes.

This is the second year of the trapping aspect of the program. In early 2010, the City partnered with St. Louis County and the Missouri Department of Health to trap adult mosquitoes and have them tested

for various diseases. This information is shared with all county and state health agencies for the control and prevention of mosquito populations and for disease prevention and management.

Fogging targets adult mosquitoes. To be most effective, fogging is conducted during the night hours when mosquitoes are most active. Fogging will begin at dusk every Thursday night from May through late September.

The Public Works Department is asking for citizens' help. It takes only three days for a mosquito egg to develop into an adult mosquito, and eggs are always laid in standing water or where water will collect. While the City treats these areas within the public rights of way, citizen help is needed concerning private property. Regular gutter cleaning and dumping of rain water can drastically reduce the number of mosquitoes and greatly improve the quality of life for all residents. Some common water-collecting items include potted plants, tires, wheelbarrows, bird baths and children's toys. Water should be removed from these items following each rain event, with the exception of bird baths, which should be treated with mosquito briquettes that can be purchased at any hardware store.

Mosquito control literature is available at City Hall or at the St. Louis County Vector Control website at www.stlouisco.com/doh/vector/mosquitos.html. For more information about Glendale's mosquito control program, please visit www.glendalemo.org.

Aquatic Center to open May 28

Glendale residents and their guests are welcome to use — at resident rates — the Kirkwood Aquatic Center in Kirkwood Park, at the corner of West Adams Avenue and South Geyer Road.

Glendale pool users must obtain an ID card from the Kirkwood Parks and Recreation Department.

The pool will be open weekdays beginning May 28 through Aug. 16 from noon to 7:30 p.m., weekends 10 a.m. to 7 p.m. and holidays from 10 a.m. to 6 p.m. From Aug. 17 through Sept. 5, the competitive and family pools only will be open weekdays 4 to 7:30 p.m., but all pool areas will be open weekends 10 a.m. to 7 p.m. and holidays 10 a.m. to 6 p.m.

All areas of the Aquatic Center are available for rental to groups after public session hours and lesson activities until 11 p.m. Rates are based on the size of the group and the facilities reserved. Call (314) 822-5859 for rental information.

For other pool information, contact the Kirkwood Aquatic Center at (314) 984-6971 or visit Glendale's website at www.glendalemo.org or Kirkwood's website at www.ci.kirkwood.mo.us/parks/pool/main.htm.

Pet tags available for \$1

Glendale Pet Tags for 2011 are still available for purchase at Glendale City Hall.

Both dogs and cats are required by Glendale city ordinance to be registered and wear a City of Glendale pet tag.

The cost of a tag is \$1 per pet. Pet tag applications may be obtained at City Hall or from the city's website at www.glendalemo.org. A summary of City ordinances related to dogs and cats also is available on the website.

All pets must be inoculated against rabies, and the date of the most recent vaccination should be noted on the license application.

Dogs must be kept on a leash or otherwise securely restrained on the owner's property. Owners must not permit pets to destroy property or otherwise create a nuisance. Dog walkers must clean up after their pets. In addition to tags, outdoor cats must wear a bell attached to the collar.

Call City Hall at (314) 965-3600 for more information.

Garage sales subject to City sign regulations

Spring weather brings opportunities for great bargains for garage sale shoppers.

The City of Glendale reminds residents holding garage sales that the city carries several restrictions regarding signs that advertise these sales.

The restrictions include:

- Sale signs may not be placed within 15 feet of the paved portion of the street.

- Signs may not be larger than four square feet.

- No more than one sign may be placed in each lot.

- Signs may be placed only between the hours of 7 a.m. and 8 p.m. and only on the day of the sale.

- Any signs posted along Lockwood Boulevard or Berry Road must have a permit from the St. Louis County Department of Highways & Traffic.

City honors 2010 outstanding employees

The City of Glendale bestowed its 2010 Employee of the Year award to Public Works Foreman Terry Jones at an awards luncheon held Dec. 17. The annual event honors employees in several categories.

“We are honoring Terry Jones not just for what he does but how he does it,” said Mayor Richard Magee in bestowing the award. “One nomination for this employee noted that he ‘never complains and comes in with a cheerful, energetic, positive attitude.’ It is especially for his ability to inspire high morale and positive motivation that we honor Terry Jones as our 2010 Employee of the Year.”

Jones joined the city staff in November 2000 and was promoted to foreman in 2002. Magee noted that the needs in the Public Works Department are almost endless. The foreman faces a constant flow of requests and often balances numerous projects. In addition to reacting to requests, Jones is proactive in identifying needs and accomplishing goals, Magee said.

The Employee of the Year award is given to an employee who has exhibited an exceptional degree of good judgment, initiative and accomplishment and has motivated co-workers and contributed to high job morale and productivity.

Community Service Award

The 2010 Michael P. Pounds Community Service Award was given to Firefighter Matt Hawkins for his volunteer work in helping a local congregation remodel a former commercial building into a place of worship. Hawkins spent many hours of personal time working on the project, including building interior walls. Hawkins also spends a considerable amount of time as a referee for a church youth basketball league, Magee said.

Special Service Award

The City bestowed a Special Service Award in 2010 to Fire Chief Larry Zeitzmann, for filling the role of interim city administrator. When the city administrator post was vacated in April, Zeitzmann took over the post while continuing to lead the Fire Department until Jeremy Hayes arrived in September as the new City Administrator.

“Larry went even further above and beyond the call of duty by lending the city his considerable carpentry skills by remodeling the city administrator’s office,” said Magee. “That sort of extra dedication is not uncommon for Chief Zeitzmann, who has constantly looked for ways to improve his

Public Works Foreman Terry Jones

department and the City as a whole.”

Milestone awards

The city also honored Jones with a 10-Year Service Award, and Lt. Mike Blevins of the Fire Department with a 20-Year Service Award. These milestone awards are presented in cooperation with the Missouri Municipal League. Police Chief Richard Black also presented Lt. Joe Laramie with a special plaque recognizing his 35-plus years of service to the Police Department.

Terry Thompson (right), trumpet player Randy Holmes and drummer Don Schroeder perform at JazzFest 2009.

12th Glendale JazzFest set for May 27

The 12th annual Glendale JazzFest will be held on Memorial Day weekend from 6 to 10 p.m. Friday, May 27 in the City Hall lower parking lot.

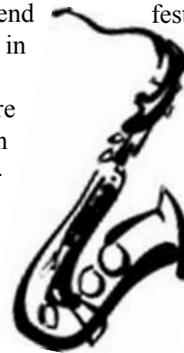

The free concert will feature music by the Terry Thompson Swing Alive Band and other local performers to be announced. Don Wolff will emcee the event, which also will feature refreshments offered for sale by local restaurants.

JazzFest was first held in 2000 to offer Glendale residents a community event for early summer. Thompson,

then a resident of Glendale, established the festival and has been coordinating and performing in it ever since.

Attendance for the event has grown from about 200 the first year to more than 3,000 in 2010.

JazzFest is presented by the Glendale Women’s Club in association with the City of Glendale and is produced by Terry Thompson Productions. The event is underwritten by several local business sponsors.
