EMERGENCY 911

City officer leads state internet crime task force

Glendale Police Lt. Joseph Laramie has brought Glendale to the national stage in the fight to combat internet crimes against children.

Laramie is the director of the Internet Crimes Against Children Task Force of Missouri, an organization formed in 2001.

"The Glendale Police Department has shown significant leadership in the battle against online predators and has gained national presence through the ICAC program," says Laramie, who started as a weekend dispatcher with Glendale in 1974. The majority of the network of 59 ICAC Task Force units across the country are led by statewide agencies or very large police departments such as Los Angeles, Dallas or Seattle.

Lt. Joe Laramie

As director of the Missouri task force, Laramie provides resources to law enforcement across the state to help react and respond to online child exploitation. The resources include training, investigative assistance, communication and prevention. He gives presenta-

tions about internet safety to national conferences and law enforcement groups across the country as well as to school and parent groups throughout Missouri.

As the Missouri point of contact for the other ICAC units and federal law enforcement agencies, Laramie reviews tips from the National Center for Missing and Exploited Children's CyberTipline and refers cases involving a suspect or victim in Missouri.

The Missouri ICAC Task Force operates within the regional unit, the Regional Computer Crime Education and Enforcement Group. Laramie's Clayton office includes police officers from Chesterfield, Clayton, Hazelwood, St. Louis

Glendale provides added value for tax dollars

With property tax bills coming due at the end of the year, it's a good time to review the City of Glendale's commitment to offering high-quality benefits and services to all Glendale citizens.

According to 2007 tax rates, Glendale homeowners pay less in municipal property taxes and utility taxes than six out of nine other nearby municipalities.

The bill for a \$250,000 house was approximately \$558 in 2007, compared to Shrewsbury at \$790, Maplewood at \$774, Webster Groves at \$678, Kirkwood at \$623, Ladue at \$586 and Richmond Heights at \$572. The Glendale figure includes \$228 for the portion of real property tax paid to the City of Glendale, \$25 for personal property tax, and \$306 for utility taxes, assuming approximately \$3,400 for utility expenses. Sales taxes are not included as they are depen-

dent on individual spending habits.

The Glendale municipal tax represents about 6.5 percent of a homeowner's entire real estate property tax bill and 7 to 9 percent of the personal property tax, depending on the school district in which the homeowner lives. The school district tax is the largest portion of property tax bills.

The only cities surveyed that are less expensive, taxwise, than Glendale are Frontenac at \$256, Brentwood at \$288 and Crestwood at \$400. These are cities that have large sales tax bases and therefore are able to rely on this revenue source to pay for municipal services.

For their tax dollars, Glendale residents have their own Police, Fire and Public Works departments as well as an emergency dispatching

Continued on Page 4

MAYOR'S MESSAGE

Dear Residents:

It is again my pleasure to provide you with a brief snapshot of the many good things happening in our City. At a time when costs are rising and financial stability is less and less certain, the City of Glendale has focused on controlling costs wherever possible and ensuring that the financial resources it has are fully protected. One way we have done this is through the creation of the Mayor's Task Force on Organizational Efficiency. This multidepartmental employee task force has been charged with the task of developing cost-saving ideas to be implemented in our organization. This task force has already shared a number of ideas, which we are in the process of implementing at considerable savings to you, the taxpayer. Another way we have worked smarter is by using

the services of a free summer intern to assist us with projects requiring local government action. Also, in September, the City was successful in negotiating a one-year rate freeze with its trash hauler. The City continues to be successful in partnering with other governmental jurisdictions such as the Metropolitan Sewer District and St. Louis County to procure funding for such projects as the new sidewalks along Berry Road and recent storm water improvements at Moreland and Edwin.

Like most of you, the Board of Aldermen and I are very concerned with the present financial turmoil and its impact on City resources. Fortunately, the City of Glendale has always taken a very conservative approach in its budgeting practices. The City remains in a strong cash position with significant cash balances and investments in local banks. For the past several months, the City has been aggressively reviewing its banking practices to ensure that all of its cash assets are fully collateralized. Further, the City's Fire and Police Pension Board is monitoring as best they

can this highly volatile financial market and reviewing its practices and procedures to ensure pension assets are reasonably protected and properly positioned to take advantage of an upswing in the market when that time comes.

I am also pleased that our community continues to experience a wide range of construction activity despite the present financial climate. A significant number of applications continue to be reviewed each month by our Architectural Review Board for projects ranging from home additions to the construction of new homes.

As you can see from the many positive articles found in this newsletter, our small community remains a leader in a number of key areas. We are very proud of Police Lt. Joseph Laramie, who is recognized in Missouri and nationally for his leadership in protecting children against internet crimes. Under the leadership of our Fire Chief and Emergency Management Director Larry Zeitmann, Glendale is also a leader in the area of disaster preparedness.

Continued on Page 5

City takes steps to control pollution from storm water discharge

Over the past five months, the city of Glendale has taken a number of steps to significantly reduce the number of pollutants commonly found in storm water run-off.

In June 2008, the Glendale Board of Aldermen passed a land disturbance ordinance, which strengthened the City's existing regulations for controlling erosion and sediments from construction sites.

At approximately the same time, the Board of Aldermen passed a "stream buf-

fer" ordinance establishing guidelines to control storm water discharge into streams. The City has contracted with St. Louis County to manage the enforcement of both of these ordinances.

Also this summer, Public Works Director Carl Politte, with the help of an unpaid college intern, developed a policy and procedures manual following guidelines provided by the St. Louis Metropolitan Sewer District. The policy is intended to ensure that the City is taking the necessary

safeguards to avoid polluting rivers and streams in the delivery of municipal services. This policy and procedures manual was adopted in August, and municipal employees will be trained and tested on the content of the manual.

These steps ensure that the city of Glendale meets the requirements of the Clean Water Act and its Phase II Storm Water Permit under the St. Louis Metropolitan Sewer District.

Residents' trash pickup bills to hold the line in 2009

Glendale residents won't have to add trash removal services to the ever-growing list of items that will cost more in 2009.

The city has successfully negotiated a one-year extension to its contract with Allied Waste Services for recycling and solid waste removal services at the same rate for 2009 as the current rate.

"I believe it was in the City's best interest to extend this contract for one year with no cost increase and re-bid this service in 2009," said City Administrator Frank Myers. "We're holding the line on cost."

Residents will continue to pay \$73.96 per quarter to the city. That amount includes \$12.50 for sewer lateral insurance.

The contract extension was approved by the Board of Aldermen on Sept. 15.

Glendale first contracted with Allied Waste (formerly Midwest Waste) in 2002 and has extended the initial three-year contract several times. The last extension covered the period from Jan. 1, 2007 through Dec. 31, 2008.

Sidewalks changing life along Berry Road

The new sidewalks recently installed on the west side of Berry Road between Manchester and Kirkham roads already have added value to the lives of some of the neighborhood residents.

Alene Haskell, a resident of Flynn Forest Lane, began asking the city for sidewalks along Berry Road seven years ago. Her then-14-year-old daughter was unable to travel in her wheelchair to visit her best friend on a nearby street because of the absence of sidewalks.

When the sidewalks were completed this August, Haskell's daughter, Alison Berezo, and her friend Katy, now 21 and 20 respectively, finally took the inaugural trip on the new pavement.

The new sidewalks are the result of several years of urging and intense lobbying by Glendale officials to St. Louis County officials. Berry Road is maintained by St. Louis County, which has jurisdiction over construction and routine maintenance. To facilitate this project, Glendale officials agreed to assume responsibility for the right of way acquisition.

City officials recognize that the new gain has not been without pain. A conflict between three utility companies delayed the relocation of two utility poles and, as a result, some of the concrete work; and abandoned construction equipment and vegetation overgrowth marred the beauty of the pristine Berry Road residences for too long.

"Sidewalk construction projects are typically disruptive and a source of aggravation to adjacent property owners," said Charles H. Tayloe, County Construction Division manager. "We are aware of this and our goal is to minimize the inconvenience during the improvement process."

But discussions between city officials and St. Louis County staff finally got the project back on track in time for residents

Night Out in Glendale

About 500 people attended the City's annual Glendale Night Out on July 22 in the Police Department's parking lot. The event raised \$64 for the Special Olympics through a dunking booth and \$383 for the Glendale/Kirkwood Kiwanis Club through sales of hot dogs, chips, pretzels and soft drinks, served by club volunteers. The Glendale Boy Scouts Troop 360 brought in \$296 from snow cone sales.

to enjoy early fall walks.

"The City was a very persistent partner in this project," said Mayor Richard Magee.

The sidewalks have had the added bonus of creating a new, vibrant social life in the area of Glendale surrounding Berry Road.

"What we've seen happening since then is more people out and about walking in Glendale," said Haskell. "People are really exploring all over Glendale and can safely walk to the elementary school. You can get pretty much everywhere. It's been good for everyone to have that access. It's allowed people the ability to exercise and to communicate with people around the neighborhood."

Susie Schoen, another Flynn Forest resident, is happy to have sidewalks for her two young daughters' bike rides and her 2-year-old's stroller walks.

"We have been enjoying being able to venture out of our neighborhood and not being landlocked," Schoen says. "It's really opened up the neighborhood."

Schoen's family, including its golden retriever, use the Berry Road sidewalks daily. "It's nice to get out and be able to see other people," she says. "And a lot more people are walking down our street."

She is glad the County put in the sidewalks, "and we appreciate it, and I think there are a lot of people who do," Schoen says.

BURNING ISSUES

Wood-burning stoves require caution

With increasing natural gas and fuel oil heating costs, many homeowners are turning to wood-burning stoves to keep their homes warm this winter. But while homeowners are saving money, they may be increasing the risk of a home fire.

Homeowners should buy a wood-burning stove from a reputable business — one who can help customers select the correct stove for their home needs.

Other safety tips for wood-burning stove owners include:

- Plate steel and cast-iron stoves last longer and retain heat longer.

- Have the stove professionally installed. A professional heating contractor will make sure there is adequate air space clearance and circulation around the stove. This service will ensure that heat radiating from the stove or chimney won't ignite adjacent combustible materials and will prevent

sparks from escaping into the house.

- Use short, hot fires rather than long smoldering fires. Do not leave the stove unattended when children are present.

- Do not store dry wood near or under the stove.

- Do not use gasoline, kerosene or charcoal starter to start a fire.

- Do not burn trash in your stove.

- Empty all ashes into a metal container with a tight-fitting lid.

- Chimneys should be inspected and cleaned frequently. Because creosote buildup varies greatly depending on the type of wood, usage and stove model, have your chimney cleaned by a professional chimney sweep. Chemical cleaners are not always effective.

- If you have a chimney fire, have the chimney inspected by a professional before using it again.

For more winter safety tips, check out the Glendale Fire Department website at www.glendalefd.com.

Glendale Police and Fire assist at debate

The Glendale Police and Fire Departments both played important roles in the protection detail for the Vice-Presidential Debate held Oct. 2 at Washington University.

Police Officer Mark McDaniel participated in the debate security as a member of the St. Louis County Municipal Mobile Response Team. It was his third debate. Officer Dan Phillips responded to a request for additional officers to provide security.

The Glendale Fire Department also was asked to assist at the debate. The operations section chief requested the use of Glendale's mini-rescue squad to stage on campus and, due to its size and maneuverability, respond to any fire events in the high-security area of the debate. Capt. Chuck Helle and

Firefighter Chad Wagner staffed the squad. Personnel and apparatus arrived on the site at 2 p.m. on debate day and remained for the duration of the event. The Fire Department also worked the 2000 presidential debate, in which Chief Larry Zeitzmann served as command staff officer, and the 2004 presidential debate, in which he served as planning section chief.

Value

from Page 1

service and administrative staff.

In addition to traditional police services, the Glendale Police Department provides residents and businesses with a wide range of comprehensive specialized services. These value-added services include residential code enforcement, animal control services, emergency dispatch services, residential vacation checks and fingerprinting services.

The Fire Department is led by Chief Larry Zeitzmann, who is an expert in emergency management and serves as the Region C Area 4 Mutual Aid Coordinator in St. Louis County. The department, which holds a Class 4 ISO rating, offers emergency medical services in partnership with Abbott EMS as well as a wide range of value-added services including annual fire inspections of all schools, churches and commercial buildings; Community Emergency Response Team training; blood pressure screenings any time of day or night; an emergency notification system; CPR and

Scouting Merit Badge classes; smoke detector and car seat installations; safety and fire prevention talks at all schools and day care centers; residential fire safety checks; and attendance at block parties, parades and community events.

Both of Glendale's public safety departments, in conjunction with city administration and the Public Works Department, have established an Emergency Operations Center that is capable of keeping city operations up and running in the event of a major storm, natural disaster or other emergency. The City's Emergency Management Division has a comprehensive emergency preparedness plan to help citizens in a major community emergency. (See story on Page 6.)

The Public Works Department provides mosquito fogging every summer and implements the Sewer Lateral Program. The department also makes sure roadways are in good condition, maintains City properties and assists at public events.

Pet tags available Dec. 1 at City Hall

Glendale pet owners may obtain their 2009 pet license tags from City Hall beginning Dec. 1. The office is open from 8 a.m. to 5 p.m. Monday through Friday.

Tags cost \$1.

City stickers for vehicles were eliminated in 2008.

www.glendalemo.org

POLICE BEAT

Parking fines increased

Parking in the wrong place at the wrong time in Glendale costs a little more, effective June 22. The Board of Aldermen recently approved an amendment to the City Code increasing parking fines from \$5 to \$10 per violation. The fine for parking in handicapped parking places or in fire lanes is now \$100 per violation.

No overnight parking

The Police Department receives many questions about why parking is not allowed between 2 a.m. and 6 a.m. on Glendale streets. The ordinance was established in 1940, restricting parking on city streets overnight to assist in preventing crime, reducing traffic accidents and allowing for clearing of the streets from “curb to curb” in inclement weather. If you have an overnight guest or construction at your home and are unable to use your driveway, contact the Police Department for temporary permission that will prevent you from receiving a ticket.

Wear a safety helmet

The Board of Aldermen recently approved an ordinance requiring ALL bicyclists, inline skaters, roller skaters, skateboarders and riders of electric personal assistive mobility devices (Segways) to wear protective headgear when riding on a public roadway, public bicycle path or other

public right of way. The protective headgear must be of good fit, fastened securely on the head with straps.

Window tinting restricted

Heavily tinted front side windows on all vehicles are now forbidden in Glendale by city ordinance. The windows immediately to the left and right of the driver may not have tinting or a sun-screening device that allows less than 35 percent light transmission, plus or minus 3 percent, or a luminous reflectance of more than 35 percent, plus or minus 3 percent, without a proper permit from the Missouri Department of Public Safety. The regulations are in accordance with state law.

New crossing guard on duty

Diane Peters has joined the Police Department staff as the school crossing guard for this academic year. She is a retired elementary school teacher whose hobbies are spending time with her grandchildren and helping animals. She will help students safely navigate the crossings at Berry Road

School crossing guard Diane Peters is on the job at Berry Road and Lockwood Avenue.

and Lockwood Avenue and at the North Glendale School.

Solicitor complaints

The Police Department has recently had an increase in the number of complaints about door-to-door solicitors. City ordinances require all solicitors, peddlers, canvassers, etc., to register at City Hall and obtain a permit. However, some groups (such as Boy Scouts, Girl Scouts, political campaign canvassers and religious groups) are required to register but not to obtain a permit. This permit must be carried by each solicitor and be provided upon request. When solicitors register at City Hall, they are instructed not to contact any resident who displays a “No Solicitors, No Peddlers” sticker at the front door. These stickers are available for your convenience at City Hall or the Police Department.

Mayor

from Page 2

Part of what makes Glendale such a special place is its family-oriented community events held throughout the year. These events always generate large crowds and are well attended by all age groups. On July 22, we held our annual Glendale Night Out. On Aug. 29, the Glendale Historical Society held its annual Ice Cream Social. And on Sept. 20, riders of bicycles, tricycles and strollers participated in the second annual Gator Ride. If you did not get a chance to

attend these events this year, you missed something special. Special thanks go to all of our citizens and community groups who helped make these events possible.

If I can ever be of assistance to you, please remember that I am only a telephone call away.

Sincerely,

Mayor Richard Magee

Emergency Management team prepares city for community disasters

Glendale public safety officials are continually refining and updating the city's ability to protect Glendale citizens in the event of a variety of public emergencies that may occur within the community's boundaries.

Following Hurricane Katrina in 2005, Mayor Richard Magee directed Fire Chief and Emergency Management Director Larry Zeitzmann and Assistant Fire Chief Don Bley to review the city's Emergency Operations Plan and develop recommendations to improve the plan. This resulted in a complete reworking of the plan to strengthen the city's ability to respond to a wide range of emergencies. In addition, Glendale city officials, including all the elected officials, were among the first communities in the area to complete the National Incident Management System (NIMS) training required by the federal government.

This training enables federal, state and local officials to provide a uniform response to a natural or manmade event. The training and updated plan proved to be extremely valuable when the city of Glendale was hit in July of 2006 with a large windstorm.

"The plan was immediately implemented with extremely successful results," said Zeitzmann. "Following that storm, Glendale was the model example for other

cities to follow in emergency response."

Since then, the team, led by Mayor Magee and the city's Emergency Management staff, has made many updates to the way Glendale prepares and responds to emergencies. The most recent update is the establishment of the Community Emergency Response Training (CERT), which educates citizens about disaster preparedness for hazards that may affect their area. The program also trains participants in basic disaster response skills, such as fire safety, light search and rescue, team organization and disaster medical operations. Using the training learned in the classroom and during exercises, Glendale CERT members can assist others in their neighborhood or workplace following an event when professional responders are not immediately available to help. CERT members also are encouraged to support Glendale's emergency response by taking a more active role in emergency preparedness projects and programs.

Early this summer, Glendale added another tool in the effort to protect citizens with the installation of an emergency broadcast notification system. This service places phone calls to all residents in the event the city is in the path of a severe thunderstorm or tornado. When activated, a prerecorded message will be sent to homes within the Glendale city limits, alerting

citizens to the potential dangers of the situation and giving direction to residents as to the immediate actions they can take to protect themselves and their families.

The team also attends local and regional meetings with other emergency agencies.

In July, Zeitzmann attended the Regional Mass Care Citizens Preparedness and Emergency Human Services Symposium in Kirkwood. The symposium was an outreach of the Governor's Faith-Based Initiative, which encourages faith-based organizations to become more active in emergency preparedness and to take a more active role in the support of local communities that have had a disaster.

Zeitzmann and his team will apply the information from those meetings to the Glendale Emergency Operations Plan. Additionally, in August, the team hosted the first meeting of the Glendale Emergency Preparedness Advisory Committee, inviting church leaders in Glendale and Warson Woods. Alderpersons Deb Voss of Glendale and Gordon Gosh of Warson Woods attended the meeting, which aimed to bring the faith community together to identify their strengths and weaknesses and to pool resources to respond in the event of a major disaster.

The team members tasked with the duties of emergency management in Glendale have a combined emergency service experience of 88 years.

Laramie

From Page 1

County, St. Louis City and Webster Groves as well as FBI agents. The Missouri unit has more than 65 law enforcement affiliates across the state, including the Missouri State Highway Patrol and the Attorney General's Office.

It all started in September 2000 when Laramie was sent by Police Chief Richard Black to Washington, D.C., for a three-day training class on Protecting Children Online for Unit Commanders.

"During that class, I first heard of the Internet Crimes Against Children Task Force Program, yet found out there were no task force resources in Missouri," Laramie says. He asked for and received permission to assemble law enforcement officials and prosecutors from St. Louis County and City to apply for a \$45,000 grant from the U.S. Department of Justice's Office of Juvenile Justice and Delinquency Prevention to form a local task force. Glendale received the grant in April 2001.

The grant program was expanded in May 2003, and the new Greater St. Louis task force became the ICAC of Missouri, with Laramie remaining the director. That statewide grant was for \$300,000, using the City of St. Louis as the grantee. In 2006, the grant was moved back to Glendale. The most recent grant, received this September, was \$450,000.

And the task force has delivered on those grants with success. "The Missouri ICAC Task Force has been a strong voice for law enforcement across Missouri," Laramie says. "The impact of the task force has grown significantly over the past few years." The number of arrests made by Missouri ICAC Task Force members and affiliates has grown from 26 in 2006, to 105 in 2007, and 105 in the first six months of 2008, he reports.

More information about the Missouri ICAC can be found on its website at www.icacmo.org. To find the CyberTipline, visit www.missingkids.com.

Edwin, Moreland get relief from flooding

Residents of Moreland and Edwin avenues should be free of backyard flooding in the future, thanks to a new storm water drainage system installed by Metropolitan Sewer District of St. Louis this summer.

MSD's contractor, Berra Construction, completed the project in mid-September, leaving the neighborhood with a new enclosed drainage system from 767 Edwin Ave. to South Moreland Avenue.

The work began in June to ease the recurring flooding of the backyards along Moreland and Edwin during heavy rainfall. Construction was completed and heavy equipment removed by mid-August, then the contractor restored the properties damaged during construction.

"Hopefully it will take care of the rains that cause the flooding without hurricanes behind them," said Stacey Monschein of South Moreland. Monschein is one of three homeowners on Edwin and two on South Moreland that were affected by the flooding problems. The first test of the new sewers occurred with the flooding that came with the remnants of Hurricane Ike in early September, not a good example, she said.

But Monschein did notice a change in the path of the flooding. "As far as the structural engineering, it sure does look like it's going to work," she said.

"We're thankful for the patience of everybody around us," Monschein said, adding that what some may consider an eyesore was an entertaining bonus during the construction. "People had a big kick out of the huge Caterpillar in the street. The kids loved it, and even the men would come and look at it."

The project, estimated at about \$187,000, was funded completely by MSD.

Glendale streets to go on low-salt diet for winter season

The Glendale Public Works Department, with the support of the Mayor and the Board of Aldermen, wants to be more environmentally friendly by salting less and plowing snow more this winter.

Using less road salt during the snow season will reduce the amount of salt introduced into the environment. Salt is

Cool summer treat

More than 400 residents came out to City Hall on Aug. 29 to enjoy ice cream treats and to socialize with neighbors at the Glendale Historical Society's annual Ice Cream Social. The event featured live music by the Rich Lauenstein Band. Advertising with signs at prominent city locations, flyers in local businesses and listings in local newspapers helped boost attendance, and assistance by the city staff helped make the event a success, said Glendale Historical Society President Merrick Mohler. "We couldn't do it without the help of the city," he said. Proceeds from the event benefit the Society's activities.

100-plus bikes ride in second GATOR event

More than 100 riders of bicycles, tri-cycles and strollers participated on Sept. 20 in the second Glendale Annual Twilight Open Ride, known as the GATOR ride.

The family-friendly event is intended to promote active family lifestyles and community events for Glendale and neighboring residents.

The rides, which included a 0.4-mile Toddler Trail and a two-mile Family Frolic

through Glendale streets, were followed by a concert, refreshments and children's movies.

The event took in \$775. Proceeds will be donated to the city for city improvements that will promote and facilitate healthy family lifestyles, organizers said. Last year, the proceeds were used to purchase red bike racks outside North Glendale Elementary School.

a corrosive material that destroys streets, sidewalks, cars and nearly everything it touches.

Salt lands directly on the edge of the road or gets bounced there by wind or passing vehicles. Due to the corrosive nature of the salt, its accumulation and persistence poses risks to aquatic ecosystems. These

salts remain in solution in surface waters and are not subject to any significant natural removal mechanisms. Plowing more will reduce salt and environmental contamination.

Therefore, residents may see some streets plowed but not completely down to water this winter.
